In the article entitled *Anti-Inflammatory and Chondroprotective Effect of TSG-6 (Tumor Necrosis Factor- α -Stimulated Gene-6) in Murine Models of Experimental Arthritis* (Volume 159, pages 1711–1721), sentence 12 in the fourth paragraph of page 1712 should have read as follows:

Pep-1 is a synthetic peptide (NH₂-GAHWQFNAL-TVRRGGGS) that shows HA-binding properties¹⁹ and can compete most likely with the Link module of either CD44 or TSG-6 (our unpublished data).
